Introduction

Type of Studies

Type of outcome variables

Sample size calculation

Introduction

Type of Studies

Study or trial?

Cross-sectional study (단면적 관찰연구)

1. prevalence study
2. Diagnostic test
3. Ecological study
4. Validity, Reliability, and agreement study

Longitudinal study (종단적 관찰연구)

Randomized controlled trial

Pilot study

Exploratory study

Confirmative study

Type of outcome variables

Primary outcomes

Secondary outcomes

Sample size calculation

2×2 cross-over design
